ERGONOMICS

# BENCH SL

The smart clamp solution for  
increased design freedom

# BENCH SL

## Modern workstation solution

Teamwork, close proximity, fast communication - the advantages of an ergonomic double workstation are obvious. Our **BENCH** system allows you to use your office space efficiently and still have plenty of freedom to plan the layout of workstations.

By perfecting our bench solution at decisive points, we have created enormous added value for you with regard to the flexible use of our square standard lift columns TM Q70.

## Office planning made easy

With our standard column TM Q70 you can now choose between both desk solutions: Single or duo workstation. To create a bench, a clamp is simply added to our standard column TM Q70. This is pushed over the outer column, the bench connector rod is inserted between them and tightened from below with a concealed screw on each column - easy!

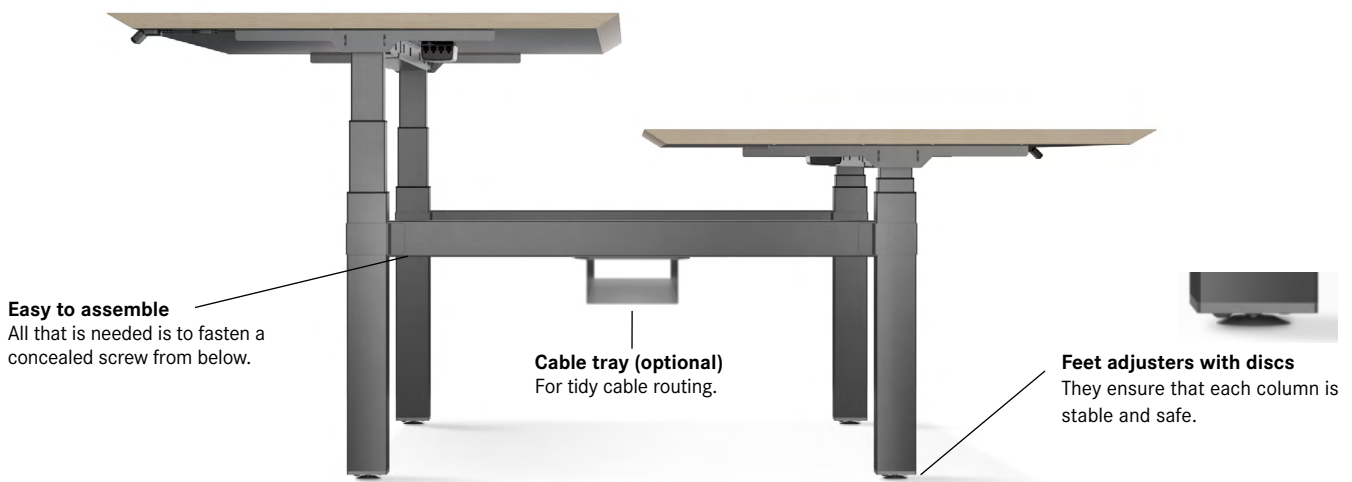

**A major advantage for you:** Thanks to the intelligent system design, our **BENCH SL** can be converted back into single workstations! Simply remove the clamps and fit the individual desks with suitable cantilever feet.

## Logistical advantage

Thanks to this easy to assemble design principle, changes to the office layout and office relocations can be carried out quickly and easily.

*This clamp grips securely and stably in place and is removable without leaving any marks.*

**Easy to assemble**  
All that is needed is to fasten a concealed screw from below.

**Cable tray (optional)**  
For tidy cable routing.

**Feet adjusters with discs**  
They ensure that each column is stable and safe.

## Short Facts — technical data at a glance:

- Lift column 2- or 3-stage, square profile (TM Q) 70 x 70 mm, with metal clamp, base plate (galvanised) and set screw
- for double workstation or single workstation
- Choice of drive
- Sliding, rigid or adjustable tabletop frame
- Bench connector rod available in three lengths: 755/855/955 mm
- Tabletop gap 25 mm with 755 mm rod length
- Tabletop gap 125 mm with 855 mm rod length (for acoustic or protective panels)
- Accessories: Clip-on cable tray
- Colours: white (9010), silver (9980), black (9011) or special colours
- For item numbers see website [www.ergo.to/benchvknr](http://www.ergo.to/benchvknr) (or simply scan the QR code)
