ECO S

Getting started to electric
height adjustment

Electric lifting table frame

The electric height-adjustable ECO S desk frame, is equipped with two powerful, low-noise, electric motors. The height can be continuously adjusted and displayed on the LCD display of the hand control (650 - 1300 mm). Your three favorite heights can be saved via memory keys on the hand control. The visually timeless foot stabilizers ensure a secure stand, even when fully extended.

The frame is equipped with an intelligent collision detection system as standard, which reliably ensures safety when the table is moved up or down. Due to the wide range of tabletop frames available for purchase, the frame can accommodate tops up to a maximum width of 1800 mm.

Compactly packaged

The frame impresses with its streamlined appearance owing to the rectangular columns
